

TECHNICAL BID / PROPOSAL

Tender ID	CPCL/IT/2026/001
Tender Title	Supply, Installation & Commissioning of High-Performance Computing Infrastructure
Bidder ID	VND001
Bidder Name	TechServe Solutions India Pvt Ltd
Bidder Location	Chennai, Tamil Nadu

1. Understanding of Requirement

TechServe Solutions India Pvt Ltd understands the requirements specified in Tender CPCL/IT/2026/001 for the supply, installation and commissioning of high-performance computing infrastructure. The proposed scope covers the supply of computing equipment, storage infrastructure, network equipment and associated support services in accordance with the technical specifications and delivery requirements stated in the tender.

2. Proposed Technical Approach

The bidder proposes a structured implementation approach consisting of requirement review, equipment configuration, procurement, pre-delivery quality inspection, delivery and installation. The proposed equipment will be configured according to the required specifications and subjected to functional testing before formal handover. A project coordinator will be assigned to manage communication, delivery schedules, installation activities and acceptance testing.

3. Quality, Support and Compliance

The bidder will provide appropriate technical documentation, warranty coordination and after-sales support for the supplied infrastructure. Installation and commissioning activities will follow documented procedures, while any identified issues will be tracked until resolution. The bidder confirms its intention to comply with the applicable technical, commercial and documentation requirements of the tender throughout the contract period.
